All Purpose Cleaners: This product cleans and shines all washable surfaces. Use on kitchen bench-tops, sinks, stoves, cupboards, shelves, floors, bathroom vanity units, basin, taps and tubs.

Disinfectant – 2 in 1: An excellent cleaner as well as a disinfectant. Simply spray and wipe to clean surfaces first, then spray again and leave for 5-minutes to kill 99% of harmful germs and bacteria. To use as a hospital grade, simply use undiluted on hard surfaces, drains, sinks and toilets; not intended to be used on therapeutic devices.

Dishwashing Liquid: This formula is tough on grease, oils & fats from cooking and the lemon fragrance eliminates the bad odours associated with food left unwashed on dishes, pots and pans, leaving your utensils sparkling clean and smelling REFRESH. It's PH balanced and biodegradable.

Window & Glass Cleaner: Confidently spray and wipe on mirrors, glass and windscreens. Wipe surfaces with a clean damp cloth. Best results with a lint free cloth or newspaper. Buff glass with a cloth to remove streaks.

Caution: Do not use on tinted windows.

Tile Cleaner: Cleans all tiles in the kitchen, bathroom surfaces and woodwork (bench-tops) too. A very safe product to use around the home. Simply spray and then wipe with a clean damp cloth or paper towel. For Floors just spray and wipe with a mop, there is no need for mop bucket.

Liquid Hand Soap: A well balance ph hand wash solution, with added moisturizers and low allergen, for greater hand protection and also for keeping your hands from drying out. Apply a small amount of hand wash to wet hands, rub together and rinse off well.
